

# ATyS C30/C40

## Control relays

Changeover  
switches

### The solution for

- Non critical buildings.

### Strong points

- Auxiliary power supply.
- Modular device.
- Extended compatibility of use.

### Conformity to standards

- IEC 61010-1
- IEC 61000-4-x
- IEC 60068-2-x

### Function

ATyS C30/C40 are modular control relays. ATyS C30/C40 allows any type of motorised changeover control: ATyS and ATyS M, contactors, circuit breakers or other motorised switches.

### General characteristics

#### ATyS C30

- ATyS D10 or D20 connection available.
- Inputs for auxiliary contact position information.
- 3U measurement on network 1 and 1U on network 2.
- 2 programmable inputs for the following functions: test on/off load, manual retransfer, priority source selection, automatic inhibit...
- Up to 2 programmable outputs for the following functions: source availability information, load shedding relay and circuit breaker control.
- 1 relay output for generator control.

#### ATyS C40

- Dual genset controller with a redundant genset application cycle (basic cycle).
- 1U measurement on each source - generator 1 & generator 2.
- 3 programmable inputs for the following functions: start/stop transfer cycle, manual retransfer, automatic inhibit...
- 1 programmable output for the following functions : source availability information and circuit breaker control.
- 2 generator control contacts (Gen1 & Gen2).

### Advantages

#### Auxiliary power supply

Two versions of the ATyS C30 are available. One version with an AC supply via the measurement inputs and another with a DC auxiliary supply.

#### Extended compatibility of use

The product is used with Socomec changeover switches, or those using identical technology. It is also compatible with contactor and circuit breaker technologies.

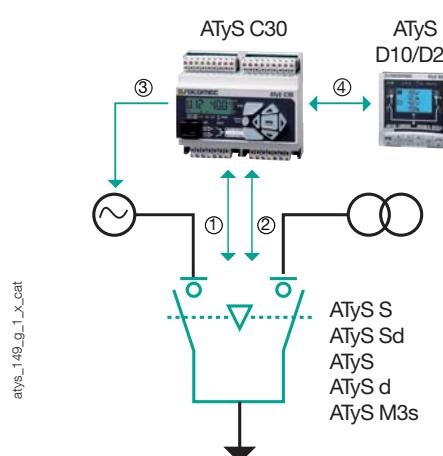

#### Modular device

The ATyS C30 and C40 are modular products (6 modules, 105 mm wide) which can be DIN rail mounted.

## Configurations

### ATyS C30:

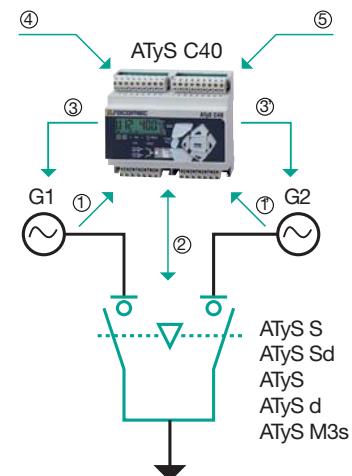

Transformer/transformer and transformer/generator applications

1. Measurement and power supply
2. Control and position information feedback
3. Generator start / stop control
4. ATyS display/interface connection

### ATyS C40:

Generator/generator applications

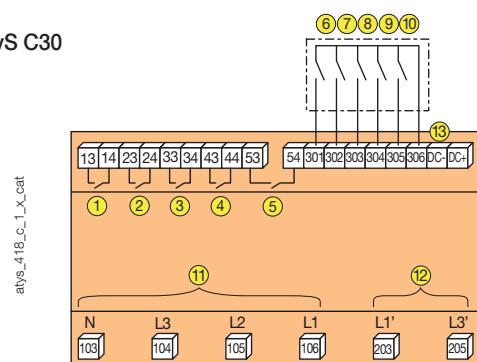

- 1 and 1. 1U measurement for each generator
2. Control and position information feedback
- 3 and 3'. Generator "start/stop" control
4. External "start/stop" command for basic cycle
5. DC power supply

## Electrical characteristics

Supplied from measurement circuit	110 ... 400 VAC
DC power supply	9 ... 30 VDC
Measurement range	110 ... 400 VAC / ± 10 %
Frequency	50/60 Hz
Accuracy	± 1 %

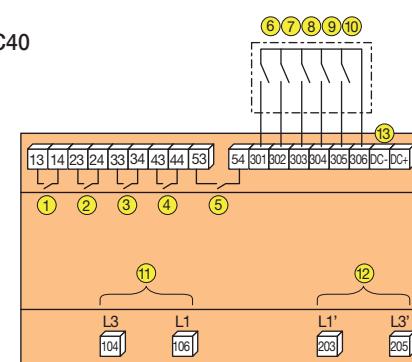

## Terminals

### ATyS C30

1. Generator start / stop control
2. Position 1 control
3. Position 2 control
4. O1: programmable output
5. O2: programmable output
6. AC1: auxiliary contact position 1
7. AC1: auxiliary contact position 0
8. AC0: auxiliary contact position 2
9. I1: programmable input
10. I2: programmable input
11. Source 1 : 3 U network measurement and power supply
12. Source 2 : 1 U network measurement and power supply
13. DC power supply 9-30 VDC (version 1599 3031)

### ATyS C40

1. Generator G1 start / stop control
2. Position 1 control
3. Position 2 control
4. O1: programmable output
5. Generator G2 start / stop control
6. AC1: auxiliary contact position 1
7. I3: programmable input
8. AC2: auxiliary contact position 2
9. I1: programmable input
10. I2: programmable input
11. Generator G1 : 1U measurement
12. Generator G2 : 1U measurement
13. DC power supply 9-30 VDC
